PROJECT

Art Store - 2020

We used Android, Java, and Firebase to develop this project. Through this project, we created a relationship between the customer and the Vendor. Vendor Upload item with details and the customer can view or buy a product.

TicTacToe Game - 2021

- I used XML and Java here to design this project.
- This game can played by Two players.
- Result is display after completion of game.

Alumni System - 2022

- I'm developing the application for college purposes.
- This project can help colleges for search jobs, create events, create a post, testimonials, donate receipts, and many more features.

Visitor Management System - 2023

- I'm developing the application for visitor purposes.
- This project helps companies to know which visitor has come to meet them. And it is located in Weston Mall.

Attendance Management System - 2023

- I'm developing the application for employee attendance purposes.
- This project will help in marking the presence of security staff of the company. This project is currently live in TCL and Wipro.
